

Answers to Questions from Meeting on June 13th, 2023

1. *Joe Bravo asked about the ownership / status of Mulberry.*

- Public Works staff confirmed that Mulberry is a City-owned road.

2. *Joe Bravo asked how the flood plain is articulated in the Master Plan.*

- The master plan does not address or articulate the flood plain directly. That is something addressed through design as a standard practice to include drainage studies as appropriate when a project is identified. The closest it comes to addressing the flood plain is the publicly supported strategy of improved water quality and invasive species management (think trees growing where they shouldn't that could impact river flow and has a flood plain impact). This can be found in Section IV of the master plan- Environmental Habitat Standards – at the following link:

[Brackenridge Park Master Plan \(sanantonio.gov\)](https://www.sanantonio.gov/DocumentCenter/View/1111111)
