

#### Introduction

The viability of the renovated Theater will be impacted by the overall trends and characteristics of the live music industry. In order to provide a perspective from which to assess how these trends may impact operations, a review of historical performance and economic dynamics of the industry was completed. Specifically, this section includes a summary of:

- Industry Structure;
- Ticket Sales & Prices:
- Event Economics;
- Performance Tiers; and,
- Live Entertainment Venues.

### B

#### **Industry Structure**

To fully understand the continually evolving economics of the live music industry, it is important to understand the function of all critical parties and their compensation mechanisms. The figure to the right illustrates the process behind the staging of a live entertainment event.

ARTISTS: Perform on contracted dates at contracted times.

Compensation: fixed quarantee and/or percentage of ticket sales.

**BOOKING AGENTS:** Directly contract with artists to represent them in negotiations and contact promoters to begin the tour planning process.

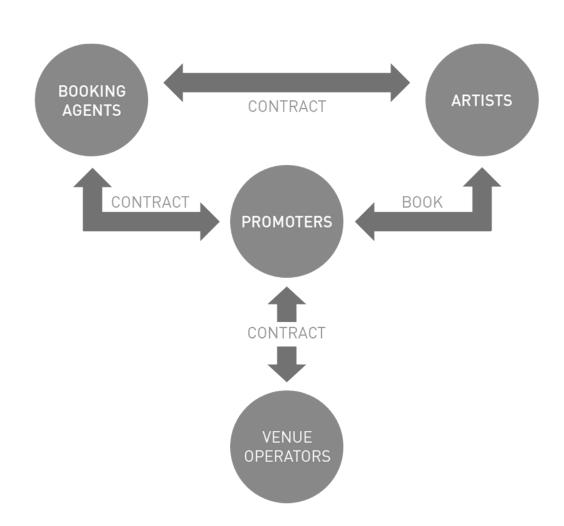

Compensation: fixed quarantee and/or percentage of ticket sales.

**PROMOTERS:** Set ticket prices, advertise events, sell tickets, organize performances, rent or otherwise provide venues and arrange for local production services.

Compensation: percentage of ticket sales.

**VENUE OPERATORS:** Provide parking and box office, security, concessions, ushering, and merchandise sales operations.

Compensation: rental income (fixed or percentage of ticket sales), facility fees (percentage or amount varies from facility to facility), parking, concessions and merchandise sales, facility sponsorships, premium seat revenue, etc.

### B

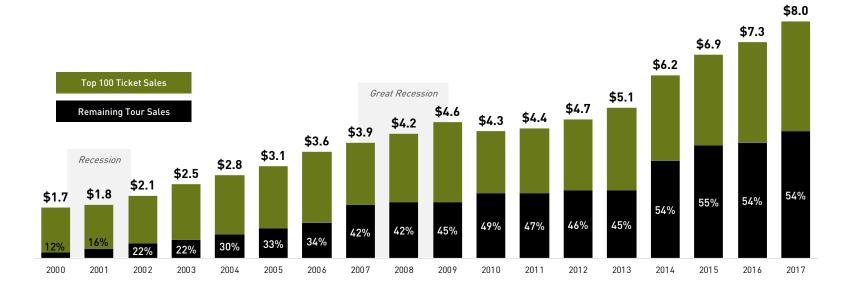

### **Concert Industry Growth**

The chart on the right illustrates annual gross ticket sales for concerts in North America from 2000 to 2017, as estimated by Pollstar, the industry's leading live entertainment event publication. It should be noted that data from 2018 and 2019 has not been publicly released.

Overall, ticket sales from 2000 to 2017 grew at a compound annual rate of nearly 10 percent. This strong growth still includes two major recessions that occurred during this period. Recessionary impacts included limited growth of six percent during the 2001 recession and negative growth of approximately seven percent one year immediately following the 2007-09 Great Recession, which was followed up by a return to positive growth in the subsequent years.

Pollstar estimates that gross ticket sales for major live entertainment acts worldwide reached \$8.0 billion in 2017, a 10 percent increase over the previous year. The top 100 concert tours accounted for \$3.7 billion in ticket sales in 2017, or 46 percent of total industry ticket sales for live music. Overall, the 46 percent share of ticket sales by the top 100 concert tours is a 10 percent smaller share than that generated in 2012, driven by the continued growth and segmentation of the industry as discussed over the following pages.

### CONCERT INDUSTRY TICKET SALES (\$BILLIONS) IN NORTH AMERICA

### B

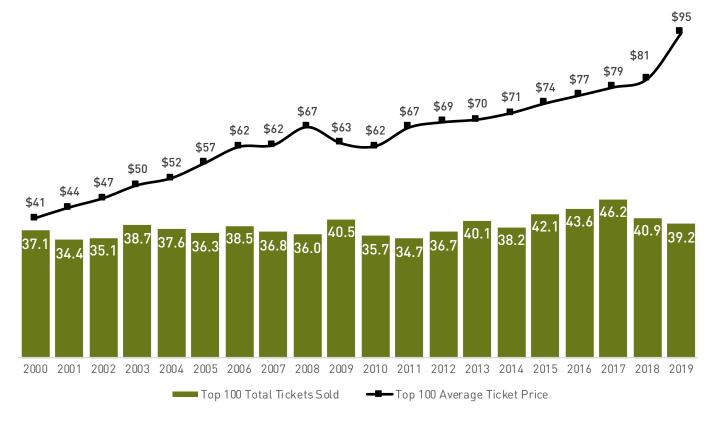

#### Ticket Sales

Since 2000, gross concert ticket revenues have steadily trended upward as total tickets sold has remained relatively stable (0.3 percent compound annual growth rate from 2000 to present), mainly driven by increases in average concert ticket prices.

The chart below shows the average ticket price for the top 100 North American tours since 2000. Over the past 18 years, the compound annual growth rate in concert ticket prices was approximately 3.7 percent, outpacing the average Consumer Price Index ("CPI") increase of approximately 2.0 percent per year over the same time period. In numerical terms, average ticket prices have nearly doubled since 2000, and can be attributed to several factors including, but not limited to:

- Realization by acts and promoters that patrons are willing to purchase tickets for more than face value from secondary market ticket re-sellers in order to see their favorite acts;
- Consolidation in the concert promotion business in which the largest promoters are paying higher guarantees in order to attract acts, resulting in pressure to charge higher ticket prices;
- The baby boomer generation, with higher disposable incomes, is relatively price inelastic and willing to pay top dollar to see certain acts; and,
- Increased guarantees demanded by artists as incomes from album sales have decreased.

These factors, especially the increased guarantees demanded by artists, have shifted the economics of the live music industry.

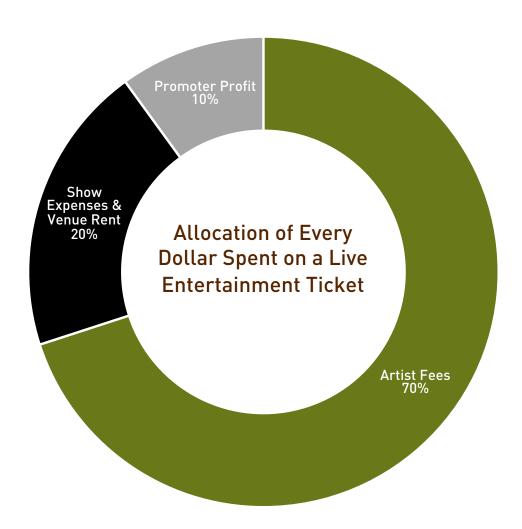

#### **Event Economics**

Artist quarantee trends have generally resulted in lower margins for promoters and live music venues, as nearly all ticket sales revenue is allotted to artists. The chart to the right illustrates a general breakdown of the average dollar spent on a live entertainment act ticket.

Live entertainment ticket revenue is generally divided between the artists, show expenses (including venue rent), and the promoter. While each deal is unique and can vary considerably based on the event and market, live entertainment ticket revenue is generally allocated as follows: approximately 65 to 75 percent of the ticket price is paid to the artist (either through a flat quarantee or a percentage of total ticket revenues); approximately 20 percent pays for show expenses including staffing, utilities, facility rent, and other such costs; and approximately five to 15 percent is retained by the event promoter.

While shifting ticket price allocation trends have tightened margins, venues and promoters have placed increased emphasis on concessions, premium sales, and sponsorships in order to make up some of the profitability lost due to larger artist quarantees. Ancillary revenue sources have become an area of negotiation in booking acts, something that was not the case a decade ago.

As artist guarantees grow, promoters need to ensure that event ticket and negotiated ancillary revenues will cover not just this guarantee, but expenses, rent and preferred profit, as well. As margins continue to tighten, it will be critical that venues identify and target only events that their local markets can readily accommodate. Promoters will only commit to a venue if they feel they can recoup and profit from their investment in the artist.

#### **Event Tiers**

To identify and understand the classification of concerts the renovated Theater might be able to support, it is important to understand the different "tiers" of touring acts. An act's tier is determined by the average gross ticket sales revenue it generates per show. This gross ticket sales revenue per show is assumed to cover the artist's compensation, show expenses, and desired promoter profit. The more popular the act, the higher the artist fee and the more gross ticket revenue per show necessary to cover all expenses. For purposes of this analysis, nationally-touring artists fall into one of five different classifications as defined below:

#### TIER 1

\$800,000+ in gross ticket sales revenue per show

**21,509** Average Attendance

**\$116.86**Average Ticket Price

**29** Annual Shows Per Artist

Example Artists: The Rolling Stones, Pink

#### **TIER 2A**

\$500,000 - \$800,000 in gross ticket sales revenue per show

**11,383** Average Attendance

**\$84.78**Average Ticket Price

**37** Annual Shows Per Artist

Example Artists: Imagine Dragons, Luke Bryan

#### TIER 2B

\$200,000 - \$500,000 in gross ticket sales revenue per show

**6,451** Average Attendance

**\$69.14**Average Ticket Price

**39** Annual Shows Per Artist

Example Artists: Bryan Adams, Gwen Stefani

#### TIER 3

\$100,000 - \$200,000 in gross ticket sales revenue per show

**4,846** Average Attendance

**\$59.73**Average Ticket Price

**90** Annual Shows Per Artist

Example Artists: Future, Jake Owen

#### TIER 4

Less than \$100,000 in gross ticket sales revenue per show

**1,821** Average Attendance

**\$59.41**Average Ticket Price

119 Annual Shows Per Artist

Example Artists: Taking Back Sunday, Miguel

#### Venues

As the concert industry has continued growing to support the various tiers of artists outlined on the previous page, different types of venues, including amphitheaters, serve to accommodate different act needs. Understanding the operational contrasts of these different venue types provides a basis from which to consider the competitive environment of a renovated Theater.

STYLE: ENCLOSED CAPACITY: < 1,000 CORE EVENT TIER: 4

### B

### Top Amphitheaters

The chart to the right depicts the United States amphitheaters that are part of the 2019 Pollstar Top 100 Amphitheaters list by annual ticket sales. As shown, the average annual ticket sales is approximately 123,000 and ranges from a low of approximately 23,000 (Rockland Trust Bank Pavilion in Boston, MA) to a high of of approximately 599,000 at DTE Energy Music Theatre in Clarkston, MI. Of these top performing amphitheaters, approximately 48 percent have annual ticket sales of over 100,000. Approximately 18 percent of the top 100 amphitheaters have a capacity of 5,000 or less, and theaters with this level of capacity, on average, generate annual ticket sales of approximately 56,200.

Additionally, six of the 100 amphitheaters are located in Texas, including the Cynthia Woods Mitchell Pavilion (The Woodlands,  $TX - 2^{nd}$  in ticket sales), Dos Equis Pavilion (Dallas,  $TX - 14^{th}$  in ticket sales), Toyota Music Factory (Irving,  $TX - 27^{th}$  in ticket sales), Whitewater Amphitheater (New Braunfels,  $TX - 55^{th}$  in ticket sales), White Oak Music Hall (Houston,  $TX - 62^{nd}$  in ticket sales), and Germania Insurance Amphitheater (Austin,  $TX - 76^{th}$  in ticket sales).

## B

### Summary

In summary, the concert industry has undergone significant growth over the past several years, which has impacted the operations of live entertainment venues nationwide. A summary of key trends that have emerged from the concert industry include:

- The North American concert market saw an average annual growth rate of nearly 10 percent between 2000 and 2017, the last year this data was made public. This strong growth belies two major recessions that occurred during this period, a testament to the industry's strong recovery following depressed economic periods.
- Talent costs have increased substantially, resulting in upward pressure on ticket prices and relatively flat attendance. As a result, the margins generated to promoters and concert venues have decreased.
- Venue operators are increasingly relying on revenue from ancillary sources such as facility fees, ticket sales rebates, concessions, merchandise, parking, advertising/sponsorships and premium seating to generate operating profits.
- As the live music industry has evolved, there has been continued segmentation among touring acts across all performance tiers. In order to be successful and make the complex economics previously outlined result in profitability, venues need to identify and fill a niche within their market for shows of specific performance tiers.

These industry trends are considered together with the local market conditions, competition within the market and the historical operations of comparable venues to estimate the event utilization and financial performance of the proposed amphitheater.
